Harness the Power of Excel in Cloud ERP

Create, Download, and Update Your Data from the Comfort of an Excel Spreadsheet

Use the power of Microsoft Excel and Oracle web services to save time and money. Ensure that Oracle remains your business's single source of ERP data by putting the end-user at the center, giving them control to manipulate and upload data from within a familiar spreadsheet using the full functionality of Excel.

Streamline mass uploads of master and transactional data through a simple, intuitive spreadsheet interface. Data validation occurs before upload, which reduces errors and provides accurate and up-to-date data, resulting in better business planning. **Now that's data integrity your company deserves.**

Scan here to discover how we can help you transform your business processes and achieve excellence.

"Massive time-savings, it now takes two days to complete tasks that took over two weeks."

- Toyota Boshoku

Transform the Way You Work

Efficiency

Save time by pasting or downloading data into your Excel spreadsheet for Oracle.

Productivity

Simple business process changes coupled with intelligent More4apps spreadsheets deliver significant productivity gains.

Accuracy

Less manual data entry means better accuracy and more meaningful information for your business.

Security

Products are built specifically for Oracle Fusion Cloud leveraging Oracle's existing security measures.

Quick to Implement

Tools that work straight out-of-the-box with a familiar Excel user interface.

Ongoing Support

A class-leading support team that solves issues and manages requests in record time.

Oracle-Secured End-User Connection	✓	✓	✓	✓

Projects Module

Easily create and update your existing project data all from one worksheet. Update your Project Budgets, Award Budgets, and Project Forecasts in a horizontal plan format for ease of use and improved visibility. Spend more time managing your project and less time dealing with project data using real-time validation.

NEW Contracts

Maximize the value of your Projects by using a flexible, customizable spreadsheet to maintain your Contracts and ensure you get the greatest ROI.

- Create, download and update Contract headers and lines including:
 - Additional information (DFFs) at header and line level
 - Associated Projects
 - Billing Controls
 - Parties and Contacts
 - Revenue and Bill Plans
- Submit for approval
- Delete Contracts

NEW Amend Contracts

Use this simple tool to change your Contract Statuses and enable the full flexibility of our Contracts integrator.

- Amend Contract Status

Financial Projects

Update your Project data by downloading existing projects and uploading directly back into Oracle.

- Create, delete, and update Financial Project information including:
 - Project Header
 - Team Members
 - Classifications
 - Tasks, Transaction Controls
 - Project Plan Baseline
 - Customers
 - Provider Business Units
- Perform mass updates to single or multiple Projects at one time
- Modify details such as end-dates as quickly as you can copy and paste
- Manage Project level attachments

Costs

Capture project-related costs and process hundreds of transactions on the same spreadsheet with customizable layouts.

- Create and delete Unprocessed Project Costs
- Perform mass creation of transactions to be processed
- Download Unprocessed Project Costs
- Download Project Costs (Processed Costs)
- Submit the 'Import Costs' process from within your data spreadsheet
- Use 'refresh' to bring back results of the Import Costs process
- Perform mass deletion of transactions that have been rejected by the Oracle Import Costs process
- Automatically create unique Oracle transaction reference numbers

Assets and Assignments

A partner tool to Financial Projects, letting you manage your Project Assets and Assignments with ease.

- Create, update, and delete Assets
- Create and delete Asset Assignments at Project or Task levels
- Download Assets and Assignments belonging to one or more projects

Award Budgets

With no ADFdi or FBDI support available, control your funding by handling Award Budgets quickly and easily.

- Create, download, update, and delete Award Budget Version Header
- Create, download, and delete Planning Resources
- Create and download Plan Lines with Planning Amount details
- Baseline a budget at the same time as creating it

Financial Plan Resource Assignments

A great partner tool to Financial Projects, make assigning resources to projects & tasks as simple as a single click.

- Create, update, and delete Resource Assignments
- Validate input against standard List of Values

Budgets

Manage Non-phased and Period-phased project budgets using a simple layout.

- Periods listed across the sheet rather than in separate rows
- Data forms to support data entry with dynamic Oracle validation including List of Values
- Status columns containing feedback from Oracle
- Real-time integration via supported web services
- All sections on the one sheet
- Download using a criteria selection form or by entering criteria directly into the sheet
- Download using wildcards using sheet download using specified columns
- Create Non-phased and Period-phased budgets
- Download existing Non-phased or Period-phased budget
- Delete Non-phased budget or Period-phased budget
- Baseline a budget at the same time as creating it

Cost Adjustments

With no ADFdi or FBDI support available, use Cost Adjustments to assist with processing adjustments for Project costs.

- Bulk creation of Adjustments across multiple Projects at once
- Reverse existing project costs
- Transfer costs to another project/task/contract/funding source/ expenditure type
- Set to capitalizable
- Set to non-capitalizable
- Set to billable
- Set to non-billable

Planning Resource Breakdown Structures (RBS)

Take control of your Projects with more flexibility to assign resources as needed.

- Create and update RBS Assignments and Planning Resources
- Download existing RBS Assignments against projects
- Download existing Planning Resources against RBS' assigned to projects

Project Templates

Maintain all your Project Templates from one spreadsheet ensuring all your tasks, classifications and Transaction Controls are consistent for your entire organization.

- Create, download, and update Project Template Headers
- Create, download, update, and delete Project Classifications and Tasks
- Create and download Project and Task Transaction Controls
- Create and download quick entries

Module Inclusive Functions

These functions are available across the entire Procurement Module.

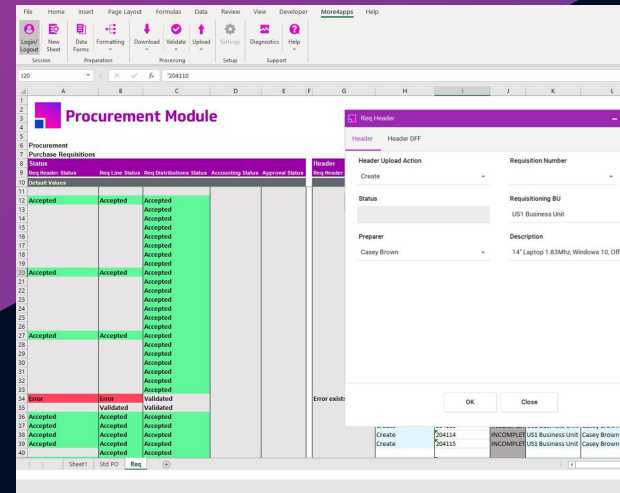

- Pre-validate information before loading into Oracle
- User forms to support data entry with Lists of Values
- Status columns containing feedback from Oracle
- Exception handling in the same worksheet without the need to maintain interface data or use ADFdi/FBDI
- Real-time integration via supported web services
- Download using a selection form or by entering criteria onto your sheet
- Download data using wildcards directly into your sheet

*"If you're making changes to Projects or Tasks, I would never ask anyone to do it manually. In fact, I refuse to do it myself. I'd rather spend the 15 minutes figuring out how to do it in **More4apps**, and get that to do it."*

- Rob Kennedy, Owner of Paso Consulting

Procurement Module

Power up your investment in Oracle Cloud ERP. Your team can create, adapt, pivot, and react to user procurement requests with a better view of the purchasing lifecycle enabling them to better negotiate discounts and save money.

Standard Purchase Orders

Create, control, and maintain your Purchase Orders from within one spreadsheet.

- Create and update orders
- Add lines to existing orders
- Add Purchase Order attachments for incomplete orders
- Submit orders for approval
- Close and cancel orders, lines and/or schedules
- Download orders for maintenance and as seed data for a new order

Requisitions

Quickly and easily create and update requisition data to reflect the real-world needs of users.

- Create and update requisitions
- Add lines to existing requisitions
- Submit requisitions for approval
- Download requisitions for maintenance and as seed data for new requisitions

Document Builder

Streamline your procurement process by generating Purchase Orders directly from requisitions in large volumes.

- Download approved and unconverted requisition lines
- Create new Purchase Orders from existing requisitions
- Submit new Purchase Orders for approval
- Ability to filter and sort requisitions by Buyer, Category, Item, Requisition Number, Preparer or Requisitioning BU

Module Inclusive Functions

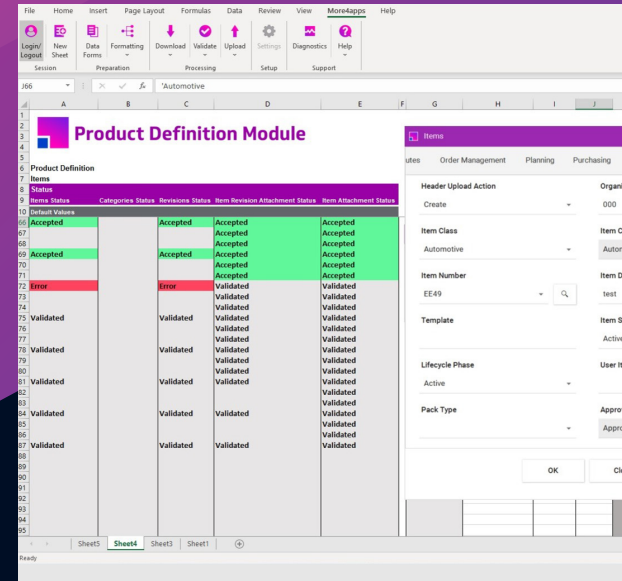

These functions are available across the entire Procurement Module.

- Pre-validate information before loading into Oracle
- User forms to support data entry with Lists of Values
- Status columns containing feedback from Oracle
- Exception handling in the same worksheet without the need to maintain interface data or use ADFdi/FBDI.
- Real-time integration via supported web services
- Download using a selection form or by entering criteria onto your sheet
- Download data using wildcards directly into your sheet

Hospitality giant Inspire Brands have transformed their procurement process by shaving 55 minutes off a 60 minute purchase order creation process - a 91% time saving.

Product Definition Module

Re-imagine your product-to-market process with improved item and structure data.

Items

Fast and accurate item maintenance is a necessity for quality reporting. Reduce the rework and increase the returns.

- Create, download, and update Items in multiple organizations on the one worksheet;
 - Item header with item attributes including Additional Information (DFFs) and item attachments
 - Item revisions including Additional Information (DFFs) and attachments
 - Item categories
- Upload multiple items, categories, and revisions for multiple organizations in a single upload
- Supports downloading of existing Items and categories across organizations

Structures

Consolidate your data from internal and external sources into Structures in your Cloud environment.

- Create, download, and update structures in one spreadsheet:
 - Structure Header
 - Components
 - Substitutes
 - Reference Designators
 - Additional Information (DFFs)
- All sections in the one sheet
- Download Item Structures with options to Implode, Explode, and select “Where-Used”
- Upload multiple structures for multiple organizations in a single load

Item Relationships

Ensure your Item Relationships are accurate and up-to-date in real-time.

- Manage the five different relationships in the same upload
- Create, update, and delete Item Relationships in one worksheet:
 - Related items
 - GTIN items
 - Cross reference items
 - Trading Partner
 - Spoke System
 - Additional Information (DFFs)

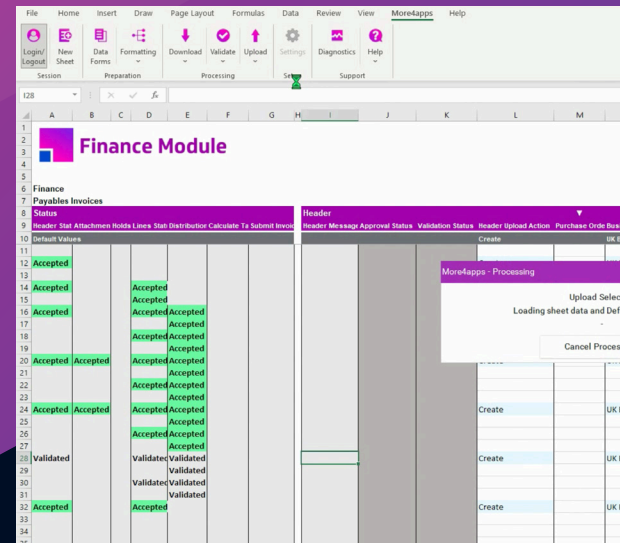

Module Inclusive Functions

These functions are available across the entire Product Definition Module.

- Pre-validate information before loading into Oracle
- User forms to support data entry with Lists of Values
- Status columns containing feedback from Oracle
- Exception handling in the same worksheet without the need to maintain interface data or use ADFdi/FBDI.
- Real-time integration via supported web services
- Download using a selection form or by entering criteria onto the sheet
- Download data using wildcards directly into your sheet

Finance Module

Avoid invoice entry bottlenecks, especially at month end, with tools designed for both Accounts Payables and Receivables users. Quickly create accurate invoices in real-time.

NEW Suppliers

Use a customizable spreadsheet with pre-import validation to swiftly update and maintain supplier data.

- Create, download, and update Supplier records including:
 - Supplier Headers
 - Addresses
 - Supplier Contacts and Communication Points
 - Contact Addresses
 - Business Clarifications
 - Products and Services
 - Sites and Site Assignment Details
- Additional Information (DFF) support at Supplier and Site levels
- Attachment support at Supplier and Site levels
- Submit the Spend Authorization process during upload

Payables Invoices

Guarantee your invoices are received and processed in a timely manner by removing manual processes.

- Upload attachments to your invoices at the same time as creating them
- Enter multiple invoices, debit memos or credit memos, all from one worksheet and with a single upload function
- Load transactions in bulk from your other data sources via a spreadsheet and improve end-user experience
- Automatically submit the payables invoice validation and calculate tax services
- Create invoices with header information only (without lines)
- Create holds on new or existing invoices
- Give users the ability to code Invoices to General Ledger combinations (or aliases), POET fields, or Purchase Order/receipt matching

Receivables Invoices & On-Account Credit Memos

Reduce your receivables errors by streamlining multiple data sources into one worksheet.

- Create invoices with General Ledger distributions at header and line level
- Created On-Account Credit Memos
- Enter multiple invoices, all from one Excel worksheet and with a single upload function
- Enter freight at the invoice level or allocated directly to lines
- Load transactions in bulk from your other data sources via a spreadsheet and improve end-user experience
- Upload attachments to your invoices at the same time as creating them

Holds and Releases

Manage your invoice holds and releases for Accounts Payable with ease.

- Place invoices on manual hold
- Release manual holds on existing invoices

Module Inclusive Functions

These functions are available across the entire Finance Module.

- Pre-validate information before loading into Oracle
- User forms to support data entry with Lists of Values
- Status columns containing feedback from Oracle
- Exception handling in the same worksheet without the need to maintain interface data or use ADFdi/FBDI
- Real-time integration via supported web services
- Download using a download criteria selection form or by entering criteria onto the worksheet
- Download data using wildcards directly into your sheet

Security & Architecture

Built with security in mind, the More4apps ERP Cloud Toolbox utilizes Oracle's secure web services to communicate with your Oracle ERP Cloud for uploads and downloads. End-users can authenticate access with their Oracle ERP Cloud credentials via standard Single Sign-on mechanisms. Our modules respect the built-in data access rules and roles Oracle's web services offer.

Key Security Features

- No additional software apart from Microsoft Excel and .Net Framework is required on the PC. There is full integration with the Oracle ERP Cloud authentication, Single Sign-on and security functionality.
- End-users authenticate with their ERP Cloud username/password.
- Access to product features is controlled through Oracles Privileges. Users can only perform actions in the tool where they have been assigned the correct Privileges.
- More4apps does not store, process, transmit or have access to any ERP Cloud data. Our modules respect the built-in data access rules, roles, and permissions by using Oracle's public web services.

Architecture

- ✓ Compatible with Microsoft Excel 2013 and later versions
- ✓ Single Sign-on compliant
- ✓ Light client install (Excel Add-In)
- ✓ Light Oracle set-up - install and set up in minutes
- ✓ Updates with Oracle's quarterly release schedule
- ✓ Oracle support compliant - harness Oracle public REST & SOAP web services only
- ✓ Uses your Oracle ERP login authentication
- ✓ Access granted by role to each web service
- ✓ Digitally signed BI reports

Support

What's Included with our ERP Cloud Toolbox Support?
After releasing a product, the More4apps team continues to improve, address, and correct security issues that arise. Customer product expansion ideas get released through this process.

Training

As a standard part of any More4apps product purchase, two hours of training for every customer's nominated in-house expert is offered at no additional cost.

Continuous Improvements

More4apps provides release notes with the updates that identify the new features or issues addressed by each release.

Support Version Upgrades

Oracle® and Microsoft® continue to develop their applications and tools. Doing so helps us further improve our tools. We actively monitor any changes and notify our customers of any implications and new features available as a result of Oracle® and Microsoft® updates. We strive to ensure our products stay compatible with the latest versions.

Fix Security Issues

More4apps is proactive in monitoring and addressing security vulnerabilities. Customers are encouraged to keep their More4apps products installed at the most current versions.

Add Enhance Features

Updates to the More4apps tools are published regularly on the website. ERP Cloud Toolbox updates are installed on each Cloud instance.

Pricing

Experience the freedom of choice and gain access to our full range of products with low up-front costs.

Our Starter Pack includes:

- ✓ **2 seats to be used across any module**
- ✓ On-demand support team 24/7
- ✓ Virtual helpdesk available to manage support queries
- ✓ Access to on-demand webinars, live events & early release communications
- ✓ Additional user access with pricing that scales quickly for your business

For your convenience check out our virtual calculator to work out your savings today!

www.more4apps.com

You'll also receive...

- Unlimited data upload/downloads for Oracle Cloud ERP
- Ability to allocate unused licenses to other More4apps products on an annual basis
- Optional learning and development for your team, including webinars that offer CPE credits, product-centric training, and general industry thought leadership

Scan the code to get access to your
7 day free trial!

"The ROI for this tool has been phenomenal for our company; not counting also how many support and enhancement tickets were solved suddenly when users gained the opportunity to mass update our customer list themselves! That alone paid for the initial [product] we bought, and more!"

- Mario, ERP Analyst in Canada
